

**Comments on Draft RAWP**

**Pohatcong Valley Groundwater Contamination Superfund Site OU3**

**Specific Comments:**

**Figure 8. Remedial Action Schedule**

Please provide a more detailed construction schedule for the purposes of field oversight planning.

**Appendix F. Operations, Maintenance, and Monitoring Plan**

Much of the existing project QAPP (Rev 9) pertains to RD activities. The RAWP FSP discusses vapor/air and soil monitoring sampling. The O&M Plan includes guidance for sampling condensate, vapor, and hot soil and includes a field sampling schedule that details the method, frequency, and location of sample. Please include in the RAWP what laboratories will be used to analyze the vapor and liquid samples collected from the above ground treatment system and what type/frequency of QC samples are planned for these samples. Also, please confirm that no other updates to the existing QAPP are necessary to complete the RA.
